System Overview:

TROLLEY

Controls rider speed

- Consistent riding experience
- Seated and prone riding positions

Quick, efficient braking

- Features pass-through progressive linear Eddy Current Technology
- Brakes riders in 1/6 of the time as competitors
- Allows for braking at 37mph

TERMINAL BRAKING

TOWER SYSTEM

Full loop - start and stop at the same location

- Truss configuration with 2 stainless steel rails
- Accommodates 3% to 34% grades
- 15' to 75' in height and 14" to 24" in diameter

UPLIFT SYSTEM

Rope tow cable system

- Transports riders to the highest point of the ride and releases them onto the downhill portion of the track.
- Allows multiple riders to be on the track at the same time, which increases throughput and decreases required staff.
